are not used or intentionally added following substances:

- Perfluoroalkyl substances (**PFASs**)

We have received a similar guarantee from our Suppliers of paper and cardboard.

However, it is not possible to exclude the possible presence of these substances as impurities of the raw materials or of the additives used. This presence, quantifiable in "traces", cannot be excluded a

priori and it is typical of many contaminants considered to be "ubiquitous". In any case, it must be considered as unintentional and unpredictable.

Monitoring of these substances is not part of our routine verification plan.

Yours sincerely
